

To Open OxyPlate

1. Grab dish lid low
2. Lift it slightly above the table
3. Squeeze to flex plastic - if needed rotate plate - repeat
4. Seal breaks
5. Plate drops to table top

To Close OxyPlate

1. Lid facing up
2. Agar facing down
3. Gently drop agar into lid
4. Seal forms in 10 or less seconds
5. Never press plate together
6. Incubate in this position
7. Handle side to side - never top to bottom
